SUMMARY

I'm a Computer Engineering student passionate about AI/ML, data structures, and full-stack development. Determined by nature, I dive deep into concepts that interest me and approach new technologies with genuine curiosity and optimism. When it comes to building products, I'm particular about crafting interfaces that are not just functional but clean, intuitive and beautiful.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, C
- **Frontend:** React.js, Next.js, Tailwind CSS
- **Backend:** Node.js, Express.js, FastAPI
- **AI/ML:** spaCy, OpenCV, TF-IDF, Tesseract
- **Databases:** Supabase, Firebase, MySQL, MongoDB
- **Tools:** Git, Canva
- **DSA :** Recursion, Sliding Window, Binary Search, Two Pointers

WORK EXPERIENCE

Software Development Intern – Sapphire Infocom

December 2025 – January 2026

- Developed UpSkillr, a full-stack MERN learning platform with role-based authentication, course management, enrollment features, and progress tracking dashboards.
- Implemented REST APIs using Node.js and Express.js for course management and user enrollment flows

PROJECTS

• CogniHire — AI-Based Resume Analyser | React · FastAPI · spaCy · Groq · Firebase

Built a full-stack AI resume analysis platform featuring a hybrid ATS scorer using a custom spaCy NER model and sentence-transformer similarity, Groq for recruiter feedback and interview prep, PDF parsing with OCR fallback, JD scraping, and AI-predicted job role matching via JSearch API integration.

• HopOn — Route-Based Carpooling Platform | Next.js · MongoDB · NextAuth · Tailwind CSS · Cloudinary

Built a full-stack carpooling platform with geospatial route-matching (MongoDB + OSRM), distance-proportional fare calculation, atomic seat booking, and driver/vehicle verification with Cloudinary uploads. Designed a dashboard with chronologically-ordered pickup-stop planning for drivers managing multiple riders.

• CasaHue - End-to-End eCommerce Website for Home Decor | React.js · Supabase · Nodemailer · Stripe

Built a full-stack platform with user authentication, cart and checkout system, payment integration, interactive UI design, and a content-based recommendation system using TF-IDF and cosine similarity.

LEADERSHIP & EXTRACURRICULAR EXPERIENCE

Design Head – LITSOC (Literary Society Club)

Don Bosco Institute of Technology | July 2024 – July 2025

- Led design team, created event branding and social media creatives, and supported planning and execution of club activities

Design Head – Colosseum Technical Fest

Don Bosco Institute of Technology | 2026

- Directed design efforts, created branding and promotional materials, and maintained visual consistency for the tech fest

EDUCATION

Bachelor of Engineering in Computer Engineering

Don Bosco Institute of Technology, Vidyavihar

Year of Graduation: 2027

CGPA (Till 6th Semester): 8.99 / 10.0

CERTIFICATIONS

- MERN Stack Development
- Python Programming
- Machine Learning
